DETAILED ACTION

Priority

1. Applicant's claim for the benefit of a prior-filed applications under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

Information Disclosure Statement

2. The information disclosure statements submitted on 12/23/2003 and 10/27/2004 have been considered and made of record by the examiner.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations (e.g. determining a coding gain for each of a plurality of transition-limiting codes and selecting one of the plurality of transition-limiting codes) cited in claims 1-11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 2611

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. As to claim 1-11, applicant in the invention disclosure fails to describe what a "transition-limiting code" is. Examiner searched other available references, but could not find a definition for "transition-limiting code".

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-11 are rejected under 35 U.S.C. 101 because as to claims 1-11, the claimed invention is directed to non-statutory subject matter which as a whole it does not accomplish a practical application. In order to accomplish a practical application, it

must produce a "useful, concrete and tangible result." (see MPEP 2106, under section II, Determine What Applicant Has Invented and is Seeking to Patent, subsection A, Identify and Understand Any Practical Application Asserted for the Invention.). Applicant in claim 1, recites an algorithm (i.e. determining a coding gain for each of a plurality of transition-limiting codes and selecting one of the plurality of codes having a largest coding gain), however there is no practical application disclosed for this algorithm.

Claim 10 is rejected under 35 U.S.C. 101 because claimed invention is directed to non-statutory subject matter which as a whole it does not accomplish a practical application. In order to accomplish a practical application, it must produce a "useful, concrete and tangible result." (see MPEP 2106, under section II, Determine What Applicant Has Invented and is Seeking to Patent, subsection A, Identify and Understand Any Practical Application Asserted for the Invention.). Applicant in claim 10 claims a signal, which is not a statutory subject matter.

Claim 11 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As to claim 11 the language of the claim is ambiguous. The examiner suggests the use of "computer readable medium encoded with a computer program".
